## experience

### INVITAE

Senior Software Engineer, NYC | Nov 2018 - Present

- Help lead a project to build a new application for mainstream physicians, emphasizing a focus on clean code, testing, and best practices. This new project opened up the company's services to a whole new customer base. Built using ReactJS, Redux, Django, and MySQL.
- Co-lead a project to integrate acquired technologies into our webstack, increasing available order types and company revenue.
- Mentor junior developers, helping them learn best practices, problem solving, and improving their coding skill.

### TODAYTIX

Senior Software Engineer, NYC | Jun 2017 - Nov 2018

- Lead web team's development of new features, including web lottery, Harry Potter exclusive, and analytics tracking using ReactJS, Redux, Lodash, and HapiJS for SSR.
- Spearheaded redesign and development of company's CMS while working closely with Product and Design, which resulted in improved user productivity. Built using ReactJS, Redux, Ramda, and PostCSS.
- Collaborated with Product and Consultants to improve website SEO, increasing sessions by 45% and purchases by 20%.
- Contributed to the reorganization of the Product and Tech teams to work in a more agile manner, leading to faster development with fewer defects.

### RESERVE

Software Engineer, NYC | Mar 2016 - Jun 2017

#### Reserve Table Management

- Developed company's flagship restaurant table management service using ReactJS, Redux, ImmutableJS, Ramda, Webpack v2, and PostCSS.
- Collaborated with Design and Product team to launch the app in Q1 2017, growing to over 200 paid users.

#### Reserve.com

- Led development of redesigned **Reserve.com** using AngularJS, Gulp, Sass.

### TIGERSPIKE

Software Engineer, NYC | Oct 2014 - Mar 2016

- Worked within waterfall and agile methodologies on fully responsive web apps with a small team of designers, developers, and product managers.
- Led development with front-end frameworks, driving use of AngularJS and Node.js within projects.
- Worked closely with clients, helping them understand technical aspects of projects.
